Suspect or Counterfeit Products Avoidance Policy

Paramount Panels UK has undertaken to provide the very best equipment, manufactured with the best quality of materials and electronic components. Suspect or Counterfeit parts are a major problem in the electronics industry. Be assured, Paramount Panels UK has always ensured that the components used in our panels are sourced from OEM Manufacturers or their approved distributors.

Furthermore, our inspection process has always been performed with suspect or counterfeit detection and avoidance in mind. The counterfeiters do not stop to rest, and neither does Paramount Panels UK In 2016 as part of our continual improvement to not only meet and exceed our customer expectations we embarked on a journey formally documenting processes and procedures specific to “Counterfeit Electronic Parts Avoidance”. To this end we ensure our suppliers are Original Manufacturers or only purchase components used on our panels from Original Manufacturers.

Paramount Panels UK commits to the following:

Factory new components will be procured directly from original manufacturers or their Authorized distributors.
Our customer will always be advised of availability issues regarding parts they require.

Parts will be scrupulously inspected in conformance by the supply of a Manufactures C of C from the Original Manufacturer.

Visual inspection, measurement, verification of date codes, lot numbers and manufacturer markings, marking permanency, non-destructive evaluation, destructive and electrical testing, burn-in etc. will be used based upon risk assessment.
